Tough inside and out

HEAT, STAIN, CHIP AND SCRATCH RESISTANT

Stone Ambassador surfaces are heat, stain, chip and scratch resistant.

Although it is tough, it isn't indestructible. Your benchtop should always be treated with care.

Stone Ambassador surfaces are heat resistant and not affected by temperatures lower than 180C. However sudden and rapid heat changes can damage the surface.

We recommend using a chopping board or trivet to place hot pots, frypans or oven trays and never place them directly onto the surface.

Care and Maintenance Guide

A "how to" guide to properly care for your new Stone Ambassador product

From our home to yours

TAKE IT FOR A TEST DRIVE

We encourage you to order a sample of our products before purchasing and test its compatibility with your daily life.

When you receive your sample, try treating it to a few different scenarios that you may face in your kitchen; spill something on it, touch it with greasy fingers, clean it.

This will help you understand how the surface responds to your daily life, how to clean it and ultimately how it will work in your home.

Please call your local Stone Ambassador office to order a sample or view a full slab in one of our showrooms.

It is extremely important that a Stone Ambassador Matt or Textured benchtop is only ever wiped down using a clean cloth dedicated for that purpose.

Do not use a cloth used to wash dishes as it may impart oil and other contaminants to the Matt or Textured finish.

As with any surface, Stone Ambassador products can be permanently damaged by exposure to strong chemicals and solvents. Do not use harsh chemical products that contain trichloroethane or methylene chloride, such as paint removers or stripper.

Avoid all contact with highly aggressive cleaning agents like oven cleaners that have high alkaline/pH levels. Should the surface be accidentally exposed to any of these damaging products, rinse immediately with water to neutralise the effect.

A tactile experience

HOW TO CARE FOR MATT & TEXTURED

Stone Ambassador Matt and Textured finishes stones are designed to reflect nature. Because of their tactile nature, website images are not fully representative of their unique properties.

Our Matt finish slabs (Kirec, Beton & Cimento) are lightly textured concrete look.

These colours feature low reflective properties, comparable to a honed stone finish. It provokes a natural style and helps to create an industrial style in any application.

Our Textured finish slabs (Valour, Firtina & Enchanted White) are a coarser style of stone that retains a smooth profile that is inviting to touch.

Low reflective properties and modern colour tones work together to create a unique tactile experience.

When considering these designs, please be aware both Matt and Textured finishes may require additional daily and weekly care, and as such it is recommended that common household spills, like liquids and water droplets and dried immediately.

As with any matt surface, owners of Matt Textured finishes may experience seeing an increase in smudges from everyday living.

Stone Ambassador Matt and Textured designs are just as stain and scratch-resistant as our polished surfaces, never require sealing and are simple to clean.

However, these designs don't disguise marks as well as polished designs, meaning more regular cleaning may be required to keep it looking as new as the day it's installed.

Stylish and functional

EVERYDAY CLEANING

Stone Ambassador requires minimal maintenance to keep your surface looking as good as new.

For everyday cleaning, simply wipe your Stone Ambassador surface with warm soapy water (using a mild detergent) and use a damp cloth.

For a deep clean, we recommend using our Stone Ambassador Cream Cleanser and microfibre cloth. When using Stone Ambassador Cream Cleaner, apply a small amount onto a damp microfibre cloth, wipe the bench in broad passes, avoiding concentrated rubbing in one area. Once your surface is covered, wipe the benchtop down with a separate clean damp cloth. Avoid using an metallic sponge on the surface.

As Stone Ambassador polished surfaces are non-porous they will keep their radiant and smooth surface without the need for sealing or polishing.

For really stubborn stains, please feel free to call our friendly customer service team on (03) 9333 8835 and they can provide you with further advise.
